

How to use this template (remove this box and the blue guidance boxes before sending)

Fill in everything **highlighted like this** . The prices shown are **suggestions**: use the lower end for small churches, NGOs and local businesses in Ghana, and the higher end for larger or international organisations. Blue boxes explain the reasoning so you can talk the client through it. Tip: send the client the name of the organisation, the features they want and your prices, and ask Claude to produce a filled-in, ready-to-send PDF.

PROPOSAL

Mobile App for [Client Organisation]

Design, development, app-store publishing and ongoing support for an Android and iPhone app.

Prepared for	[Contact name, title]
Prepared by	[Your name / studio name] · [phone] · [email]
Date	[Date]
Valid until	[Date + 30 days]
Reference	[P-2026-001]

1. Summary

[Client Organisation] wants a mobile app that brings its **[messages, events, resources, products]** together in one place, keeps members informed with announcements and newsletters, and makes it easy to **[give / buy / book / get in touch]** .

This proposal covers building the app, setting up the systems behind it, publishing it on the Google Play Store **[and Apple App Store]** , training your team, and supporting it after launch.

Why this matters: open with the client's goals in their own words. They buy outcomes (members informed, more giving, easy access) more than features.

2. What the app will do

For members and the public

- Home screen with the latest content and announcements
- Audio and video: stream messages in the app, with background play and lock-screen controls
- Live streaming of services or events from YouTube
- Daily quotes or devotionals, easy to share
- Store: books and products with buy links
- Giving: PayPal, Mobile Money and bank details with one-tap copy
- About, leadership biography, handbook or FAQs
- Social media and contact links, prayer or contact requests
- Optional accounts: email sign-up, password reset
- Newsletter sign-up by email or text
- Push notifications for announcements and daily messages
- AI assistant that answers questions about the organisation

For your team (admin dashboard in the app)

- Post announcements with a flyer, and send them by email, text and push notification in one tap
- "Write it with AI" to draft announcements from a few notes
- Edit books, products, quotes, giving details, links, service times and the theme, with no app update needed
- Add or remove admins
- Subscriber counts and delivery results

Also included

- App icon, store graphics and screenshots
- Privacy policy and Play Store data-safety forms
- Store listing text
- Handover guide and a training session

3. Packages and price

Feature	Starter	Standard	Premium
Content screens: about, biography, FAQs, contact, social links	✓	✓	✓
Audio and video streaming, live services	✓	✓	✓
Daily quotes, store with buy links, giving screen	✓	✓	✓
Google Play Store publishing	✓	✓	✓
Accounts, newsletter sign-up, push notifications	—	✓	✓
Admin dashboard: announcements with email, text and push	—	✓	✓
Admin content editing: books, products, quotes, links	—	✓	✓
AI assistant and "Write it with AI"	—	—	✓
Apple App Store (iPhone) publishing	—	—	✓
Custom branding pack (icon, splash, store graphics)	Basic	✓	✓
Revision rounds	1	2	3
Free bug fixes after launch	30 days	60 days	90 days
One-time price	[\$2,500–5,000]	[\$6,000–12,000]	[\$12,000+]

Pricing guide: for Ghanaian or West African clients, Starter is about GH¢ 30,000–55,000, Standard GH¢ 65,000–130,000 and Premium GH¢ 130,000+ (convert at the day's rate). For US, UK or EU clients the same work is often priced 2–4 times higher. Agencies charge \$30,000–80,000+. Quote in one currency and state it clearly.

Payment schedule

Milestone	Share	Amount
Deposit, on signing (work starts)	50%	[amount]
Test version delivered to your phones	30%	[amount]
App live on the store(s)	20%	[amount]

Payment by **[bank transfer / Mobile Money / PayPal]** within **[7]** days of each invoice. Work pauses if a payment is more than **[14]** days late.

4. Timeline

Week	What happens	What we need from you
------	--------------	-----------------------

1	Kick-off, content gathering, design direction	Logo, photos, text, links, giving details
2–4	Build the app and admin dashboard	Quick answers to questions
5	Test version on your phones, revisions	Feedback within 3 days
5–7	Google Play closed test (new accounts must test with 12+ people for 14 days), store listing	12+ testers' Gmail addresses
7–8	Store review and launch, training session	Store account access

Timeline starts when the deposit and content are received. Store review times are set by Google and Apple.

5. What's included and what isn't

Included	Not included (quoted separately)
- Everything in the chosen package - Setting up the app's backend, email and notification services in your name - Store listing, graphics, privacy policy, data-safety answers - Revision rounds as listed - Bug fixes for the period listed after launch - One training session (online or in person) and a written guide	- Fees charged by third-party services (see section 6) - Writing, photography or video production - New features after sign-off - Changes needed because a third party changes its rules or pricing - Websites, unless agreed - Support after the free period, unless on a support plan (section 7)

6. Running costs (paid by you, directly to each service)

These services run behind the app. They're billed to **your** card in **your** accounts, so you always control them. Most are free while the app is small.

Service	What it does	Free allowance	When it costs
Google Play	Android store	—	\$25 once
Apple Developer	iPhone store	—	\$99 per year (if iPhone)
Supabase	Accounts, database, photos, sending	50,000 users, 1 GB files, 5 GB bandwidth/month	\$25/month when larger
Brevo	Email newsletters and codes	300 emails a day	From about \$9/month for 5,000 emails
SMS provider	Text announcements (optional)	—	Per text, depends on country and provider
Expo	App builds, push notifications	Push notifications free	Not needed normally
Anthropic (AI)	AI assistant and drafting (optional)	—	A few cents per use (prepaid)
Domain	Web address and branded email (optional)	—	About \$10–20 per year

Typical total: \$0/month at launch, about \$10–50/month as the audience grows. Text messages are the one cost that can climb quickly, so we recommend free push notifications and email as the main channels.

Why the client pays these directly: they own the accounts and data, you're never out of pocket, and nothing breaks if you part ways. If the client prefers one bill, you can pay the services and re-bill them monthly, usually with a 10–20% handling fee. Put that in writing.

7. Support plans (optional, monthly)

	Basic	Standard	Premium
Keeping services running and monitored	✓	✓	✓
Bug fixes	✓	✓	✓
Yearly Android and iOS updates (stores require these)	✓	✓	✓
Small changes and help each month	1 hour	4 hours	10 hours
Response time	3 working days	1 working day	Same day
Monthly usage and cost report	—	✓	✓
Newsletter and content help	—	—	✓
Per month	[\$100]	[\$250]	[\$500]

Extra work beyond the plan is **[\$25–60]** per hour, or a fixed price per feature agreed in advance. Plans run month to month with **[30]** days' notice to cancel.

Why you need this: Google and Apple require apps to be updated for new phone software roughly once a year, or the app can be hidden from the store. A support plan pays you for that responsibility and gives you steady monthly income.

8. Ownership, accounts and privacy

- **Your accounts:** the store, backend, email and domain accounts are created in **[Client Organisation]**'s name. **[Your name]** is added as a team member for the build and support.
- **Code and content:** when paid in full, you own the app's content and receive the source code. **[Your name]** may reuse general, non-client-specific code and may show the app in their portfolio.
- **Your data:** member and subscriber data belongs to you, is stored in your accounts, and is only used to run the app.
- **Changes in scope:** new requests after sign-off are quoted in writing before work starts.
- **Store approval:** we follow Google's and Apple's rules and handle any review feedback. Final approval decisions rest with the stores.

9. Acceptance

Package chosen: **[Starter / Standard / Premium]** · Support plan: **[None / Basic / Standard / Premium]**
· Total one-time price: **[amount]**

For **[Client Organisation]**

Name, title, date

For **[Your name / studio]**

Name, date

Third-party prices are approximate as of **[month year]** and set by each provider.
